### What this standard covers

This standard specifies the terms and definitions, requirements, test methods, inspection rules and signs, packaging, transportation and storage of the numerical control system of batch dyeing machines. This standard is applicable to the numerical control system for the automatic control of the dyeing process of intermittent equipment such as normal temperature and normal pressure dyeing machines, high temperature and high pressure dyeing machines, air (liquid) atomizing dyeing machines, which are mainly used in textiles with microprocessors as the core.

### Document data

International classification (ICS): 59.120.50.

Chinese classification (CCS): W92.

Estimated length of the Chinese original: 13,131 words.
