Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for Standardization Work Part 1: Structure and Drafting Rules for Standardization Documents" drafting.

This document is the second part of GA 1802-2022 "Anti-terrorism prevention requirements in the field of biosecurity". GA 1802-2022 has been released the following sections.

- Part 1: High-level pathogenic microorganism laboratory;
- Part 2: Pathogenic microorganism bacteria (virus) species collection center;
- Part 3: High biosafety risk vaccine production units.

This document is sponsored by the Office of the National Anti-Terrorism Work Leading Group, the Science and Technology Education Department of the National Health Commission, and the Animal Husbandry and Veterinary Department of the Ministry of Agriculture and Rural Affairs Bureau, the Anti-Terrorism Bureau of the Ministry of Public Security, and the Science and Technology Information Bureau of the Ministry of Public Security.

This document is under the jurisdiction of the National Security Alarm System

Standardization Technical Committee (SAC/TC100).

1 Scope

This document specifies the key targets and key locations, key target levels and Protection level, overall protection requirements, normal secondary protection requirements, normal primary protection requirements, abnormal protection requirements and security protection system technology Require.

This document is applicable to the anti-terrorism prevention work and management of the pathogenic microorganism bacteria (virus) species preservation center.

2 Normative references

The contents of the following documents constitute the essential provisions of this document through normative references in the text. Among them, dated references for documents, only the version corresponding to the date is applicable to this document; for undated reference documents, the latest version (including all amendments) is applicable to this document.

GB 12899 General Technical Specifications for Handheld Metal Detectors GB 17565-2022 General technical requirements for anti-theft safety doors GB/T 22239 Basic Requirements for Network Security Level Protection of Information Security Technology GB/T 28181 Technical Requirements for Information Transmission, Exchange and Control of Networked Public Security Video Surveillance System GB/T 32581-2016 Technical requirements for intrusion and emergency alarm systems GB 35114 Public Security Video Surveillance Network Information Security Technical Requirements GB/T 37078-2018 Technical Requirements for Access Control System GB 37300 Specifications for video image information collection in key areas of public safety GB 50348 Safety Engineering Technical Standards GB 55029 General Specifications for Security Engineering GA 69 Explosion-proof blanket GA/T 644 Technical Requirements for Electronic Inspection System GA 844 Anti-smash transparent material GA 1802.1 Anti-terrorism prevention requirements in the field of biosecurity Part 1: High-level pathogenic microorganism laboratory WS315 Technical specifications for establishment of preservation institutions for pathogenic microorganisms (viruses) transmitted between humans

3 Terms and Definitions

The following terms and definitions defined in GB 50348 and WS315 apply to this document.

Designated by the competent health department of the State Council or the competent department of agriculture and rural areas to receive, identify, centrally store and manage bacteria in accordance with regulations (Virus) species or samples, and can provide

microorganisms capable of causing disease to humans or animals to units legally engaged in pathogenic microorganism experiments.

The institution of a (poisonous) species or sample.
