Information investigation on road traffic accident

道路交通事故信息调查

(English Translation)

Issued on: January 1, 1970

Implemented on: January 1, 1970

Issued by: Ministry of Public Security

Table of Contents

Preface
1 Scope
2 Normative references
3 Terms and Definitions
4 General Requirements
5 Basic Information Survey Items and Methods
6 Vehicle Information Survey Items and Methods
7 Items and methods of party information investigation
8 Road Information Survey Items and Methods
9 Management Information Survey Items and Methods
10 Comprehensive Analysis Information Survey Items and Methods
Appendix A (normative) Information Survey Form for Road Traffic Accidents with More than 3 Deaths at a Time
Appendix B (normative) Applicable General Procedures for Handling Road Traffic Accident Information Survey
Appendix C (normative) Applicable Summary Procedures for Handling Road Traffic Accident Information Survey

Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for Standardization Work Part 1: Structure and Drafting Rules of Standardization Documents" drafted.

This document replaces GA/T 1082-2013 "Information Investigation of Road Traffic Accidents". Compared with GB/T 1082-2013, except for structural adjustment in addition to editorial changes, the main technical changes are as follows.

- a) changed the scope (see Chapter 1, Chapter 1 of the 2013 edition);
- b) Changed the terms and definitions of "Information Investigation of Road Traffic Accidents" (see 3.1, 3.1 of the 2013 edition);
- c) Changed the terms and definitions of "party" (see 3.2, 3.2 of the 2013 edition);
- d) Deleted the classification and classification of traffic accidents (see Chapter 4 of the 2013 edition);

- e) Changed the requirements for road traffic accident information investigation (see 4.1, 5.1 of the 2013 edition);
- f) Changed the person in charge of road traffic accident information investigation (see 4.2, 5.2 of the 2013 edition);
- g) Change the investigation items of an accident with more than 3 deaths, an accident handled by the general procedure, and an accident handled by the simplified procedure project requirements (see 4.5, 5.4 of the 2013 edition);
- h) Added latitude and longitude and its survey method (see 5.4);
- i) Whether it is a secondary accident and its investigation method are added (see 5.8);
- j) Added air temperature and humidity and its investigation method (see 5.12);
- k) Added road monitoring/vehicle video and its investigation method (see 5.18);
- l) Added safety measures and investigation methods for the parties after the accident (see 5.19);
- m) Added the impact on road traffic and its investigation method (see 5.20);
- n) Deleted indirect property damage and its investigation method (see 6.17 of the 2013 edition);
- o) Added basic vehicle information (see 6.1);
- p) Added vehicle owners and their investigation methods (see 6.1.8);
- q) Added the body color and its investigation method (see 6.1.9);
- r) Added vehicle shape and its investigation method (see 6.1.10);
- s) Changed the vehicle identification number and its investigation method (see 6.1.11, 7.20 of the 2013 edition);
- t) Added fuel types and their investigation methods (see 6.1.12);
- u) Added the types of new energy vehicles and their investigation methods (see 6.1.13);
- v) Added the driving method and its investigation method (see 6.1.14);
- w) Added whether to apply dark window film and its investigation method (see 6.1.21);
- x) The vehicle registration/inspection situation and its investigation method have been changed (see 6.1.22, 7.35 of the 2013 edition);
- y) Added vehicle modification and its investigation method (see 6.1.23);
- z) Whether the operation is illegal and its investigation method are added (see 6.1.26);
- aa) Added whether it is a shared vehicle and its investigation method (see 6.1.27);

- bb) The collision overlap degree and its investigation method have been added (see 6.1.34);
- cc) The vehicle disintegration part and its investigation method are added (see 6.1.45);
- dd) The damage location of the window glass and its investigation method are added (see 6.1.46);
- ee) Added whether the vehicle power supply system is damaged and its investigation method (see 6.1.47);
- ff) The maximum intrusion site inside the vehicle and its investigation method have been added (see 6.1.48);
- gg) Added intrusion objects and their investigation methods (see 6.1.49);
- hh) The damaged door cannot be opened and its investigation method is added (see 6.1.50);
- i) Added damage to components in the driving area and its investigation method (see 6.1.51);
- j) The types of punctures and their investigation methods have been added (see 6.1.52);
- kk) The puncture tire number and its investigation method have been added (see 6.1.53);
- l) Added the production date number of the punctured tire and its investigation method (see 6.1.54);
- mm) Added vehicle safety devices and their investigation methods (see 6.1.55);
- nn) Added the vehicle safety management device and its investigation method (see 6.1.56);
- oo) Added whether the tachograph/EDR data is readable and its investigation method (see 6.1.57);
- pp) Added assisted/autonomous driving function and its investigation method (see 6.1.58);
- qq) Added information on large and medium-sized passenger cars (see 6.2);
- rr) Added information on heavy and medium trucks and trailers (see 6.3);
- ss) Added electric bicycle information (see 6.4);
- tt) Added information on operating passenger cars (see 6.5);
- uu) Added the road transport certificate and its investigation method (see 6.5.2);
- vv) Added whether to drive on the approved route and its investigation method (see 6.5.4);
- ww) Whether the chartered/tourist passenger vehicle has a chartered route plate and its investigation method (see 6.5.5);

- xx) Added the vehicle dynamic monitoring terminal and its investigation method (see 6.5.9);
- yy) The routine maintenance of the vehicle and its investigation method have been added (see 6.5.11);
- zz) Added the first-level maintenance of the vehicle and its investigation method (see 6.5.12);
- aaa) Added the level of vehicle maintenance and its investigation method (see 6.5.13);
- bbb) The number of equipped drivers and their survey methods have been added (see 6.5.14);
- ccc) Added the connection transportation situation and its investigation method (see 6.5.15);
- ddd) Added general freight vehicle information (see 6.6);
- eee) Added information on dangerous goods transport vehicles (see 6.7);
- fff) added school bus information (see 6.8);
- ggg) added electric vehicle information (see 6.9);
- hhh) Added assisted/autopilot function information (see 6.10);
- ii) Added the information of the vehicle on fire (see 6.11);
- jj) Added the basic information of the parties (see 7.1);
- kkk) Added the purpose of travel and its investigation method (see 7.1.9);
- ll) Add the place of residence and its survey method (see 7.1.10);
- mmm) The state of consciousness of the casualty at the accident scene and its investigation method have been added (see 7.1.19);
- nnn) added the time from accident to hospital admission and its investigation method (see 7.1.20);
- ooo) Added the information of the motor vehicle driver (see 7.2);
- ppp) Added educational level and its survey method (see 7.2.3);
- qqq) Added breath alcohol test and its investigation method (see 7.2.9);
- rrr) Drug/Controlled Substance Testing and its investigation methods have been added (see 7.2.11);
- sss) Added the types of detected drugs/controlled drugs and their investigation methods (see 7.2.12);
- ttt) Added the number of serious traffic violations within 2 years and the investigation
