Foreword

This standard was drafted in accordance with GB/T 1.1-2009 given rules.

This standard replaces GA 214.15-2005 "resident population management information - Part 15. resident population management information data exchange Format ", compared with GA 214.15-2005 main technical changes are as follows.

- Change the standard name and standard number;
- Change the way data is loaded, it changed from a data file exchange interfaces for the record mode;
- User membership information for the record management information instead of the resident population classified information exchange packet type (see 4.1, Section 7 of the 2005 edition chapter);
- User membership information for the record management data entries instead of the resident population information and data loading services related to exchange packets of data items (See Chapter 2, Section 9 of the 2005 edition 4);
- Removed and identity card production and management services (see the 2005 edition, Chapter 7);
- Remove the number of citizenship heavy signal processing operations (see the 2005 edition, Chapter 7);
- Remove the resident population data exchange of information related to abnormal data exchange program (see the 2005 edition of Chapter 7).

The date of implementation of this standard GA 214.15-2005 annulled.

The standard proposed by the Ministry of Public Security Bureau.

This standard by the Ministry of Public Security computer processing Standardization Technical Committee and Information Technology.
