What this standard covers

This standard specifies the method of gas chromatography (GC) and gas chromatography-mass spectrometry (GC-MS) for morphine and monoacetylmorphine in urine of forensic drug users. This standard is applicable to the qualitative and quantitative analysis of morphine and monoacetylmorphine in urine or other urine that is detected by morphine screening in the forensic scientific drug suspects.

Document data

International classification (ICS): 13.310.

Chinese classification (CCS): A92.

Estimated length of the Chinese original: 11,111 words.
