Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting is required.

This document replaces GA/Z 1405-2017 "Guidelines for the Formulation and Revision of Public Security Standards". Compared with GA/Z 1405-2017, in addition to structural adjustments, in addition to the integration and editorial changes, the main technical changes are as follows.

- a) The expression of the roles and responsibilities of each participant has been changed to further clarify the work requirements (see 4.1, 4.1 of the 2017 version);
- b) Added mandatory standard project establishment requirements (see 4.2.2);
- c) The filling regulations of the Public Security Standardized Information Management System have been changed (see 4.2.4, 4.2.2 of the 2017 edition);
- d) The standard formulation and revision cycle has been changed, shortening the formulation and revision cycle of recommended standards to 18 months and the formulation and revision cycle of mandatory standards to 18 months.
The period is shortened to 24 months (see 4.2.5, 4.2.3 of the 2017 edition);
- e) Added the requirement that the project application unit solicits the opinions of the unit proposing the standard and jointly formulates the standard implementation plan with it (see 5.1.2, 5.1.2 of the 2017 edition);
- f) Added specific requirements for project review (see 5.2.2.2);
- g) The requirements for enterprise qualifications have been deleted (see 5.3.2.1 of the 2017 version);
- h) The content of letter review has been deleted (see 5.5.3.2 and 5.5.4.1 of the 2017 version);
- j) The expression of the review content and handling results has been changed (see 5.8, 5.8 of the 2017 version);
- k) Added implementation and supervision related requirements (see Chapter 8, Chapter 8 of the 2017 edition).

Introduction

This document is a revision of the Guidelines for the Formulation and Revision of Public Security Standards (2017 Edition).

The procedures and requirements will provide a basic basis for the formulation and revision of public security standards, and improve the quality and efficiency of the formulation and revision of public security standards.

Since the original document was issued and implemented in 2017, the national and public security standardization reform and innovation have continued to deepen, and new and updated requirements for standardization work have been put forward.

First, the Standardization Law of the People's Republic of China, the National Standards Management Measures and other laws and regulations have been revised.

The Outline for the Development of Standardization and the Measures for the Administration of Mandatory National Standards have been issued successively, which have played a significant role in improving the quality of standard supply and standard management.

The new era has put forward all-round requirements in terms of improving standards, promoting and applying standards, strengthening supervision of standard implementation, and strengthening standard testing and verification.

The public security work has undergone historic changes in the modern era. The public security reform has made major breakthroughs in many important areas and key links.

The public security standardization management work should be guided by the implementation direction, improve the quality and efficiency of standard formulation and revision, and strengthen the management of the whole life cycle of standard formulation and revision.

In view of this, the original document can no longer fully meet the requirements of the public security standard formulation and revision work, and the technical content needs to be adjusted accordingly.

Revised.

This revision further clarifies the division of responsibilities and proposes the concepts and main responsibilities of "standard proposing unit" and "project application unit";

Further highlight the implementation orientation, the standard formulation and revision plan adopts the organizational form of reporting at any time and issuing plans regularly.

The deadline for submitting materials is shortened to 18 months, and work requirements such as standard implementation effect evaluation and supervisory spot checks are

proposed.

Guidelines for the formulation and revision of public security standards

1 Scope

This document stipulates the general principles, procedures and requirements for the formulation and revision of public security standards, as well as the formulation of standard amendments, adjustment of standard items, Requirements for standard implementation and supervision.

This document applies to the formulation, revision, implementation and supervision of public security standards.
