What this standard covers

This standard specifies the basic requirements for the terms and definitions, principles, testing equipment and reagents, testing procedures, and data analysis of human mitochondrial DNA next-generation sequencing testing conducted by forensic science DNA laboratories. This standard is applicable to forensic science DNA laboratories for the next-generation sequencing analysis of mitochondrial DNA for various forensic evidence materials and samples, and to provide mitochondrial DNA genetic information for forensic science practice.

Document data

International classification (ICS): 13.310.

Chinese classification (CCS): A92.

Estimated length of the Chinese original: 14,193 words.
