What this standard covers

This standard specifies the inspection objects, inspection equipment, inspection methods, identification conditions, operation steps and appraisal opinions, etc. of the inspection of gun parts in the field of forensic science. This standard applies to the inspection of gun parts in the field of forensic science. This standard does not apply to the parts of guns that launch spherical projectiles powered by compressed gas and the specific kinetic energy of the muzzle is lower than 11J/cm², as well as general parts such as mechanical or electronic products that can be purchased legally and without modification in the civilian market (such as pins, screws, springs, etc.) inspection.

Document data

International classification (ICS): 13.310.

Chinese classification (CCS): A92.

Estimated length of the Chinese original: 8,817 words.
