What this standard covers

This standard specifies general principles for hazardous chemicals road transport route planning, candidate route selection, data collection, safety risk analysis, other condition analysis and route comparison and selection, etc. This document is suitable for public security agencies to evaluate and compare the safety risks of different routes when planning standing routes, prohibited and restricted routes, or designated routes for the road transportation of hazardous chemicals. The planning of other routes for the road transportation of hazardous materials can be implemented as a reference.
