Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting is required.

Introduction

In order to better perform its functions, the National Immigration Administration needs to vigorously promote the use of artificial intelligence, robots, big data, the Internet and other technical equipment.

For applications in border port control and border inspection, it is necessary to strengthen the standardization of public security entry and exit windows, expand the use of the Internet, self-service equipment, etc.

The new technology service scope will improve the ability to serve foreigners and Chinese citizens in the entry and exit.

Therefore, the National Immigration Administration studies and publishes a standard system to promote standardization construction and promote new technologies, new equipment and new management models.

In-depth application in the field of immigration management will further enhance the ability of informatization application in the field of immigration management and promote the simplification of immigration management work.

The System Table is the basic document for standardization work in the field of immigration management. It is a summary of existing, developing and to-be-developed standards.

gather.

- a) It is helpful to formulate the planning and deployment of standardization work from a global perspective;
- b) It is helpful to clarify the focus and direction of standardization work in the field of immigration and provide a basis for the formulation and revision of future standards;
- c) It is conducive to creating conditions for the adoption of international standards and advanced foreign standards;
- d) Provide support for the establishment of a professional technical committee for standardization in the field of immigration management and the establishment of a long-term mechanism for standardization work in the field of immigration management support.
