What this standard covers

This standard specifies the classification method and classification elements of security incidents of the public security video image information system, and specifies the categories and levels of security incidents of the public security video image information system. This standard applies to the security incident assessment, detection and early warning, and emergency response activities of the public security video image information system deployed on the public security video transmission network. The public security video image information system deployed on other networks shall refer to it for implementation.
