Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for Standardization Work Part 1: Structure and Drafting Rules of Standardization Documents" drafted.

This document is part 1 of GA/T 452 "Technical Specifications for Printing of National Identity Cards". GA/T 452 has issued the following sections.

--- Part 1: Printing quality requirements;

--- Part 2: Technical requirements for printing equipment.

This document replaces GA 452.1-2004 "Technical Specifications for Resident Identity Card

Printing Part 1: Printing Quality Requirements", which is the same as GA 452.1-Compared with 2004, except for editorial changes, the main technical changes are as follows.

--- Modified to a recommended standard.

Please note that some content of this document may be patented. The issuing agency of this document assumes no responsibility for identifying patents.

1 Scope

This document specifies the requirements for printing quality in the process of making resident ID cards, describes the inspection methods, and establishes inspection rules.

This document applies to the production of resident identity cards.

2 Normative references

The contents of the following documents constitute essential provisions of this document through normative references in the text. Among them, dated citations documents, only the version corresponding to that date applies to this document; for undated references, the latest edition (including all amendments) applies to this document.

GB/T 250-2008 Textile color fastness test gray sample card for evaluating discoloration
