Foreword

Please note that the basic content of this section may involve patents, this part of the release mechanism should not bear the responsibility to identify these patents.

GA/T 669 "urban network alarm monitoring system technology standard" is divided into 11 parts.

- Part 1. Common technical requirements;
- Part 2. Safety requirements;
- Part 3. Front technical information collection requirements;
- Part 4. video and audio encoding and decoding technology requirements;
- Part 5. information transmission, switching, control technology requirements;
- Part 6. video and audio display, storage, broadcast technical requirements;
- Part 7. management platform technology requirements;
- Part 8. transmission platform technology requirements;
- Part 9. bayonet information recognition, matching, monitoring system technical requirements;
- Part 10. Wireless video and audio monitoring system technical requirements;
- Part 11. General requirements for critical equipment.

This section is GA/Part 6 T 669's.

This part is proposed by the Ministry of Public Security Technology Bureau.

This part of the National Security Alarm System Standardization Technical Committee (SAC/TC100) centralized.

This section drafted by. Albert Tianjin World Digital Technology Co., Ltd., the first Institute of Ministry of Public Security, Beijing State-invasive security alarm network technologies Surgery Ltd., Beijing Barnes Storage Technology Co., Ltd., Hangzhou H3C Technologies Co., Ltd., Beijing Univision Aegis security technology company, Beijing Sound Xun Technology Co., Ltd., Beijing Fu Shengxing An anti-Technology Co., Ltd. Beijing Granville as Data Systems Co., Ltd., Beijing Hanbang has Ltd., Shanghai Information Technology Co., Ltd. St. Bridge, Chengdu Branch of the Electronics Research Institute.

1 Scope

GA/T 669 provisions of this part of the city network alarm monitoring system (GA INS), the video and audio information display, storage, broadcast Put the technical requirements, the urban network alarm monitoring system construction planning, design, project implementation, system testing and acceptance and related equipment Development, production of the fundamental basis.

This section applies to urban network alarm monitoring system, other areas of network alarm monitoring system can be adopted by reference.

2 Normative references

The following documents contain provisions which, through reference GA/T 669 of this text, constitute provisions of this section. For dated reference documents Member, all subsequent amendments (not including errata content) or revisions do not apply to this section, however, encouraged to reach under this section Parties to research agreement to use the latest versions of these documents. For undated reference documents, the latest versions apply to this section.

General technical requirements GA/T 669.4-2008 urban network alarm monitoring system of technical standards for Part 4. video and audio encoding and decoding technology requirements GA/T 792.1-2008 urban network alarm monitoring system management standards - Part 1. image information collection, access,

use Management requirements

3 Terms, definitions and abbreviations

GB 20815-2006, GB 50348-2004, GA/T 669.1-2008 established in the following terms, definitions and abbreviations, Apply to this section.

3.1 Terms and Definitions

3.1.1

The video and audio information is displayed on the operating device.

3.1.2

Recording video and audio information to the operating carrier.

3.1.3

Record and save video, audio, data and has referred to the non-volatile device data, including disk, tape, disk arrays, tape arrays
