What this standard covers

This standard specifies the definition, function and configuration of the on-site survey vehicles, technical conditions, test methods, inspection rules, signs, on-board documentation and transport and storage. This standard is applicable to the design and production of the on-site surveying car series of the vehicle and the second-class chassis modification, and also can be used as the basis for relevant departments to purchase and check such equipment.

Document data

International classification (ICS): 13.310.
