What this standard covers

This standard specifies the technical requirements of the indentation electrostatic precipitator used in forensic science, including the main performance, inspection methods, inspection rules, marking, packaging, transportation and storage of products. This standard applies to the electrostatic principle of paper indentation and the appearance of dust as the main method of presentation equipment (hereinafter referred to as products).

Document data

International classification (ICS): 13.310.

Chinese classification (CCS): A92.

Estimated length of the Chinese original: 6,618 words.
