What this standard covers

This Chinese standard specifies the intrusion alarm system installed in the interior of the ultrasonic Doppler probe specific requirements and test methods. This standard is GB 10408.1 "intrusion detectors Part 1: General requirements" supplement, and with IEC 839-1-1 "General requirements for alarm systems, "in conjunction. The purpose of this standard is to provide an ultrasonic Doppler probe to ensure good performance and lowest false positives

Document data

International classification (ICS): 13.310.

Chinese classification (CCS): A91.

Estimated length of the Chinese original: 8,848 words.

Adopted international standard: IEC 60839-2-4-1990, IDT.

Supersedes the earlier edition GB 10408.2-1989.
