Foreword

This Standard replaces GB 14884-2003, Hygienic Standard for Preserved Fruits.

Compared with GB 14884-2003, the major changes of this Standard are as follows.

- the standard name is changed into "National Food Safety Standard - Preserved Fruits";
- the application scope is changed;
- the terms and definitions are changed;
- the raw material requirements are changed;
- the sensory requirements are changed;
- the physical-chemical indexes are changed;
- the microorganic indexes are changed.

National Food Safety Standard - Preserved Fruits

1 Application Scope

This Standard applies to all types of preserved fruits.

2.1 Preserved fruit

product which is made with fruits and vegetables as the principal raw materials, and by adding (or not adding) food additives and other supplements, and curing (or not curing) with sugar or honey or salt, including sugar cured type, dried type, candied type, activated type,

preserved fruit cake type, preserved fruit roll type and so on.

3.1 Raw material requirements

Raw materials shall be as specified in relevant food standards and related stipulations.

3.2 Sensory requirements

Sensory requirements shall be as specified in Table 1.

3.3 Contamination limit and mycotoxins limit

3.3.1

Contamination limit shall be as specified in GB 2762.

3.3.2

Mycotoxins limit shall be as specified in GB 2761.

3.4 Microorganic limit

3.4.1

Pathogenic bacteria limit shall meet the provisions on ready-to-eat products of vegetable and fruit in GB 29921.

3.5 Food additives

Use of food additives shall be as specified in GB 2760.

3.6 Pesticide residue limit

Pesticide residue limit shall be as specified in GB 2763.
