

ICS 27.120.30
CCS F 09

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB 15146.4-1994

**Nuclear criticality safety for fissile materials outside reactor.
Nuclear criticality safety criteria for steel-pipe intersections
containing aqueous solutions of fissile material
(English Translation)**

Issued on: July 7, 1994

Implemented on: January 1, 1995

Issued by: State Bureau of Technical Supervision

What this standard covers

This Chinese standard applies to uniform aqueous solution containing uranium or plutonium steel pipe intersections technical guidelines for nuclear criticality safety and technical conditions. Does not involve the safety design of process equipment required for chemical, mechanical technology, fluid dynamics, or other engineering principles to specific information. This standard applies to an aqueous solution of uranium or plutonium uniform storage, transport and processing steel pipes encountered during transition.

Document data

International classification (ICS): 27.120.30.

Chinese classification (CCS): F09.

Estimated length of the Chinese original: 10,178 words.

Adopted international standard: ANSIANS 8.9-1987, MOD.
