

ICS 27.120.30

CCS F 09

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB 15146.5-1994

**Nuclear criticality safety for fissile materials outside reactors.
Nuclear criticality control criteria and subcritical limits for
plutonium-natural uranium mixtures
(English Translation)**

Issued on: July 7, 1994

Implemented on: January 1, 1995

Issued by: State Bureau of Technical Supervision

What this standard covers

This Chinese standard specifies the operation, processing, handling plutonium a mixture of natural uranium for nuclear criticality control guidelines and simple geometry of plutonium a mixture of natural uranium in some isolated cells subcritical limits. This standard applies to outside reactor operation, processing and handling of plutonium a mixture of natural uranium. This standard does not apply to the assembly of these materials under controlled conditions (eg critical experiment).

Document data

International classification (ICS): 27.120.30.

Chinese classification (CCS): F09.

Estimated length of the Chinese original: 15,114 words.

Adopted international standard: ANSIANS 8.12-1987, MOD.
