CCS J 64

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB 15579.1-2013

Replacing GB/T 15579.1-2013

Arc welding equipment - Part 1: Welding power sources

弧焊设备 第1部分：焊接电源

(English Translation)

Issued on: April 25, 2024

Implemented on: November 1, 2024

**Issued by: State Administration for Market Regulation, China National
Standardization Administration**

Table of Contents

Preface
Introduction
1 Scope
2 Normative references
3 Terms and Definitions
3.1 General Terms and Definitions
3.2 Terms and definitions related to battery systems
3.3 Terms and definitions related to efficiency and idle power measurements
4 Environmental conditions
5 Test
5.1 Test conditions
5.2 Measuring instruments
5.3 Compliance of components
5.4 Type inspection
5.5 Routine inspection
6 Protection against electric shock
6.1 Insulation
6.2 Protection against electric shock during normal use (direct contact)
6.3 Protection against electric shock in fault conditions (indirect contact)
7 Thermal performance requirements
7.1 Fever test
7.2 Temperature measurement method
7.3 Temperature rise limit
7.4 Load test
7.5 Commutator and slip ring
8 Thermal protection
8.1 General requirements
8.2 Structure
8.3 Installation
8.4 Movement Ability
8.5 Action
8.6 Reset

8.7 Indicator

9 Unconventional operation

9.1 General requirements

9.2 Fan stall test

9.3 Short circuit test

9.4 Overload test

9.5 Capacitor short circuit test

10 Power supply connection

10.1 Input voltage

10.2 Multiple Input Voltages

10.3 Input circuit connection method

10.4 Terminal marking

10.5 Protection Circuit

10.6 Cable Fixing Devices

10.7 Cable entry hole

10.8 Input circuit on/off switch device

10.9 Input cable

10.10 Input coupling device (plug)

11 Output

11.1 Rated no-load voltage

11.2 Agreed load voltage values for type inspection

11.3 Mechanical switch device for regulating output

11.4 Output circuit connection

11.5 Power supply for external devices connected to the welding circuit

11.6 Auxiliary power output

11.7 Welding cables

12 Control loop

12.1 General requirements

12.2 Insulation of control circuits

12.3 Operating voltage of remote control circuit

13 Anti-electric shock device

13.1 General requirements

13.2 Types of protection against electric shock

13.3 Requirements for protection against electric shock

14 Mechanical requirements

14.1 General requirements

14.2 Housing

14.3 Lifting device

14.4 Drop

14.5 Tilt stability

15 Nameplate

15.1 General requirements

15.2 Description

15.3 Content

15.4 Tolerance

15.5 Direction of rotation

16 Output Regulation

16.1 Adjustment form

16.2 Marking of regulating devices

16.3 Control indication of current or voltage

17 Instructions for use and labeling

17.1 Instructions

17.2 Identification

Appendix A (Normative) Nominal voltage of power supply system

Appendix B (Informative) Example of dielectric strength combination test

Appendix C (Normative) Unbalanced load of AC TIG welding power source

C:1 Rule

C:2 Unbalanced load

C:3 Unbalanced Load Example

Appendix D (Informative) Calculation of temperature at shutdown time

Appendix E (Normative) Input circuit terminal structure

E:1 Terminal size

E:2 Terminal connections

E:3 Terminal structure

E:4 Fixing of terminal blocks

Appendix F (Informative) Comparison with non-international units

Appendix G (Informative) Adaptability of power supply to measure true effective value of input current

Appendix H (Informative) Drawing of static characteristic curves

H:1 Rule

H:2 Method

H:3 Results Analysis

Appendix I (Normative) 10Nm impact test method

I:1 Pendulum impact hammer

I:2 The mass of a freely falling steel ball

Appendix J (Normative) Thickness of the metal sheet of the shell

Appendix K (informative) Example of nameplate

Appendix L (informative) Graphical symbols for arc welding equipment

L:1 Rule

L:2 Use of symbols

L:3 Symbols

L:4 Symbol combination examples

L:5 Control Panel Example

Appendix M (Informative) Measurement of efficiency and idle power

M:1 General conditions for measurement

M:2 Measurement

M:3 Test report

M:4 Test report template

Appendix N (Normative) Measurement of contact current

Appendix O (Normative) Battery-powered welding power sources

O:1 Rule

O:4 Environmental conditions

O:5 Test

O:6 Protection against electric shock

O:7 Thermal performance requirements

O:8 Thermal protection

O:9 Non-routine operation

O:10 Connection to power supply

O:14 Mechanical requirements

O:15 nameplate

O:17 Instructions for use and labeling
