Preface	
Introduction	
1 Scope	
2 Normative reference documents	
3 Terms and Definitions	
4 Environmental conditions	
5 Category	
5.1 General	
5.2 Process method	
5.3 Guidance method	
5.4 Cooling method	
5.5 Arc ignition method in plasma process	
6 Test conditions	
6.1 General	
6.2 Type test	
6.3 Routine inspection	
7 Protection against electric shock	
7.1 Rated voltage	
7.2 Insulation resistance	
7.3 Dielectric strength	
7.4 Protection against electric shock during normal use (direct contact)	
7.5 Requirements for arc ignition and arc stabilizing voltage	
8 Thermal rating	
8.1 General	
8.2 Temperature rise	
8.3 Heating test	
9 Pressure in liquid cooling systems	
10 Resistant to welding spatter	
11 Mechanical protection	
11.1 Impact resistance	
11.2 Accessible parts	
11.3 Handle material	

12 Nameplate

13 User Manual

Appendix A (informative) Additional terms

Appendix B (Normative) Position of the welding torch (gun) during the heat test

Appendix C (informative) Water-cooled copper block

Appendix D (informative) Copper block with holes

Appendix E (informative) Slotted copper rod

Reference

Foreword

This document complies with the provisions of GB/T 1.1-2020 "Standardization Work Guidelines Part 1: Structure and Drafting Rules of Standardization Documents" Drafting.

This document is Part 7 of GB/T 15579 "Arc Welding Equipment". GB/T 15579 has released the following parts.

- Part 1: Welding power source;
- Part 2: Liquid cooling systems;
- Part 3: Arc starting and arc stabilizing devices;
- Part 4: Periodic inspection and testing;
- Part 5: Wire feeding device;
- Part 6: Load limiting equipment;
- Part 7: Welding torch (gun);
- Part 8: Gas circuit devices for welding and plasma cutting systems;
- Part 9: Installation and use;
- Part 10: Electromagnetic compatibility (EMC) requirements;
- Part 11: Welding clamps;
- Part 12: Welding cable coupling device;
- Part 13: Welding clamps;
- Part 14: Calibration, validation and consistency testing.

This document replaces GB/T 15579.7-2013 "Arc welding equipment Part 7: Welding torch (gun)" and is consistent with GB/T 15579.7-2013 in addition to structural adjustments and editorial changes, the main technical changes are as follows.

- a) Increase and refinement of "scope" (see Chapter 1);
- b) Two items are added and one item is deleted in "Terms and Definitions" (see Chapter 3, Chapter 3 of the 2013 edition);
- c) One item is deleted for the ambient air temperature range and one item is added for the relative air humidity (see Chapter 4, Chapter 4 of the 2013 edition);
- d) The test environment temperature and electrical measuring instrument accuracy requirements have been changed (see 6.1, 2013 version of 6.1);
- e) Add voltage rating requirements for mechanically guided submerged arc welding torches (guns) and torch (gun) coupling devices (see 7.1);
- f) Delete the requirements related to the welding torch (gun) arc ignition and arc stabilizing voltage (see 7.3 of the 2013 edition);
- g) Added additional requirements for plasma cutting torches (see 7.3.2);
- h) Added requirements for arc starting and arc stabilizing voltage (see 7.5);
- i) Added requirements for mechanically guided welding torches (guns) and smoke exhaust welding torches (guns) (see 8.1);
- j) Added submerged arc welding torch (gun) (see 8.3.5);
- k) Added the inapplicable scope of "resistance to welding spatter" (see Chapter 10);
- l) Add requirements for handle materials in "Mechanical Protection" (see 11.3);
- m) Add requirements for smoke exhaust welding torches (guns) in the "Instructions for Use" (see Chapter 13).

This document is equivalent to IEC 60974-7:2019 "Arc Welding Equipment Part 7: Welding Torch (Gun)".

Please note that some content in this document may be subject to patents. The publisher of this document assumes no responsibility for identifying patents.

Introduction

Arc welding equipment mainly includes power supplies powered by power grids or batteries, as well as mechanical devices driven by arc welding and similar processes (such as arc welding Power supply and plasma cutting system, etc.), auxiliary equipment, welding accessories, etc.

GB/T 15579 "Arc Welding Equipment" stipulates the safety requirements, performance requirements and electromagnetic compatibility requirements of arc welding equipment, and consists of 14 parts composition.

---Part 1: Welding power source. The purpose is to specify the safety requirements and performance requirements of welding power sources.

---Part 2: Liquid cooling systems. The purpose is to specify the safety requirements and structure of the liquid cooling system of the auxiliary equipment welding torch (gun).
structural requirements.

---Part 3: Arc starting and arc stabilizing devices. The purpose is to specify the safety requirements for arc starting and arc stabilizing devices of auxiliary equipment.

---Part 4: Periodic inspection and testing. The purpose is to specify the periodic inspection and test procedures for welding power sources and to ensure that after maintenance electrical safety requirements.

---Part 5: Wire feeding device. The purpose is to specify the safety requirements and performance requirements for wire feed devices of welding accessories.

---Part 6: Limiting load equipment. Intended for connection to single-phase public low-voltage supply systems and designed for non-professionals Safety requirements and performance requirements for load-limited arc welding and cutting power sources and auxiliary devices used.

---Part 7: Welding torch (gun). The purpose is to specify the safety requirements and structural requirements for welding accessories welding torches (guns).

---Part 8: Gas circuit devices for welding and plasma cutting systems. The purpose is to provide for auxiliary equipment flammable gas or oxygen Safety requirements and performance requirements for gas circuit devices.

---Part 9: Installation and use. The purpose is to specify the requirements for the installation and use of arc welding equipment.

---Part 10: Electromagnetic compatibility (EMC) requirements. The purpose is to specify the electromagnetic compatibility requirements for arc welding power sources and auxiliary equipment.

---Part 11: Welding pliers. The purpose is to specify the safety requirements and performance requirements for welding accessories and welding clamps.

---Part 12: Welding cable coupling devices. The purpose is to specify the safety requirements and performance of welding accessories and welding cable coupling devices
Require.

---Part 13: Welding clamps. The purpose is to specify the safety requirements and performance requirements for welding accessories and welding clamps.

---Part 14: Calibration, validation and consistency testing. The purpose is to specify the validation requirements for arc welding and its external monitoring equipment and arc
