What this standard covers

This Chinese standard specifies the following for 1 000 V 50 Hz or 60 Hz AC power Particular requirements for ballasts for fluorescent lamps (excluding ballast resistor). Its supporting cathode fluorescent lamp can bring warm, but also can be used without preheating the cathode, can work with a starter, it may not work with the starters, these lamps rated power, size and characteristics should meet IEC 60081 and IEC 60901 in the regulations. This standard applies to complete ballasts and their component parts, for example: reactors, transformers and capacitors. Thermally protected ballasts special requirements are given in Appendix B.

Document data

International classification (ICS): 29.140.99.

Chinese classification (CCS): K74.

Estimated length of the Chinese original: 19,153 words.

Adopted international standard: IEC 61347-2-8-2006, IDT.

Supersedes the earlier edition GB 19510.9-2004.
