What this standard covers

This Chinese standard relates to heavy-duty vehicle exhaust emission control system durability requirements and test methods. For using exhaust aftertreatment device, the design speed greater than 25km/h for M2, M3, N2 and N3 categories and the total mass greater than 3500kg category M1 vehicle type approval and production consistency check for exhaust emission control system durability assessment. Where the use of a motor vehicle exhaust aftertreatment device according to GB 14762-2002 or GB 17691-2001 first stage ?, stage ? or GB 17691-2005 for type approval and production consistency check, shall meet the standards for exhaust pollution emission control system durability. An independent technical assembly for type approval exhaust aftertreatment device, perform this standard.

Document data

International classification (ICS): 13.040.50.

Chinese classification (CCS): Z64.

Estimated length of the Chinese original: 19,123 words.
