Foreword

GB/T 2260 "People's Republic of China administrative divisions Code" published since 1980, has been widely used in China's planning, statistics, people Census, economic census, of agriculture, social security, information technology, education, personnel management, organizational management, and many other fields. Practice has proved that, this standard is an important country in the modern management of basic standards.

GB/T 10114-2003 "county-level administrative divisions coding rules for" should be supporting the use of this standard.

GB/T 2260 of this revision, to between 1 January 2002 to 31 October 2007, the State Council or the Ministry of Civil Affairs and the county Approval documents above the county level administrative divisions changed as the basis.

The revision of the standard GB/T 2260-2007, instead of the GB/T 2260-2002.

GB/T 2260-2007 compared with the GB/T 2260-2002, corresponding to a major change in the performance of administrative divisions code revisions and changes Division name change, amounted to. revoke digital code 238, assigned new digital code 255; revocation letter codes 104, 103 new endowed letter code;

Division name change 182.

Appendix A of this standard and Appendix B is an informative annex.

The standard proposed by China National Institute of Standardization.

This standard by the National Standardization Technical Committee on Information Classification and Coding.

This standard drafting units. China National Institute of Standardization, Ministry of Civil Affairs Division Quhuadiming.

1 Scope

This standard specifies the People's Republic of China at the county level and above the county level administrative divisions of the digital code and letter codes.

This standard applies to administrative divisions above the county level are identified, information processing and exchange.

2 Normative references

The following documents contain provisions which, through reference in this standard and become the standard terms. For dated references, subsequent Amendments (not including errata content) or revisions do not apply to this standard, however, encourage the parties to the agreement are based on research Whether the latest versions of these documents. For undated reference documents, the latest versions apply to this standard.

GB/T 3304-1991 Chinese Roman alphabet spelling of the name of all ethnic groups and codes
GB/T 7407-1997 China and world main shipping trade ports
GB/T 15514-1998 People's Republic of China and the relevant port location codes
Compilation principles and structure of the 3-digit code

3.1 Administrative division numeric code (referred to as the digital code) uses three six-level code structure, hierarchically represent all provinces (autonomous regions, straight Municipalities and special administrative regions), cities (regions, autonomous prefectures and leagues) and counties (autonomous counties, county-level cities, flag, Autonomous Banner, municipal districts, forest, SAR).

3.2 digital code structure code bits from left to right means.

The first layer that is the code represents the first two provinces, autonomous regions, municipalities and special administrative regions.

The second layer that is an intermediate code indicates two cities, regions, autonomous prefectures, leagues and municipalities under the jurisdiction of municipal districts/counties summary code, province (autonomous region) directly under the county Level administrative divisions summary code, in which.

--- 01 to 20, 51 to 70 represent the city, 01, 02 also used to mean municipalities under the jurisdiction of municipal districts and counties summary code;

--- 21 to 50 represent regions, autonomous prefectures and leagues;

--- 90 denotes provinces (autonomous regions) directly under the county administrative summary code.

That is the third layer represents two counties, autonomous counties, cities counties, flag, Autonomous Banner, municipal districts, forest, DC, in which.

--- 01 to 20 represent districts, regions (prefectures and leagues) jurisdiction county-level city, municipal, DC, as well as provincial (autonomous regions) directly under the county level administrative divisions the county-level cities, 01 municipal districts usually indicates summary code;

--- 21 to 80 represent counties, autonomous counties, flag, Autonomous Banner, forest, jurisdiction in the HKSAR;

--- Represents 81 to 99 provinces (autonomous regions) the jurisdiction of county-level city.

3.3 To ensure the uniqueness of the digital codes, due to the changes of administrative divisions occurred revoke digital code is no longer assigned to other administrative divisions.

Compilation principles and structure of the 4-letter code

4.1 Administrative divisions letter code (abbreviated letter code) follow the scientific, unity, practical coding principles, with reference to the county administrative divisions above Roman alphabet spelling of the name, prepared to take the corresponding letter.

4.2 provinces, autonomous regions, municipalities and special administrative regions represented by the two-letter code in capital letters.

4.3 municipalities and regions, autonomous prefectures and leagues, counties, autonomous counties, cities counties, flag, Autonomous Banner, municipal districts, forest, DC, with three-letter code in capital letters FIG.

4.4 of administrative divisions letter code adopted GB/T 15514-1998 or GB/T 7407-1997 in the letter codes in the code table marked with numbers.

Roman alphabet spelling of 4.5 names of administrative divisions commonly used Chinese Roman alphabet spelling of place names; but when the administrative division name to Mongolian,
