### Foreword

This standard replaces GB 25192-2010 "National food safety standard - Processed cheese"

Compared with GB 25192-2010, the main changes of this standard are as follows.

- MODIFY the standard name;
- MODIFY the scope;
- MODIFY the terms and definitions;
- MODIFY the sensory requirements;
- DELETE the physical and chemical indicators;
- MODIFY the microbial limits;
- ADD "4 Others"

National food safety standard - Process(ed) cheese and cheese products

### 1 Scope

This standard applies to processed cheese and cheese products.

#### 2.1 Processed cheese

It is a product, which is made by heating, stirring, emulsification (drying) and other processes, using cheese (more than 50%) as the main raw material, by adding other raw materials, with or without food additives and nutritional fortifiers.

## **2.2 Cheese products**

A product, which is made from cheese (ratio 15% ~ 50%) as the main raw material, by adding other raw materials, with or without food additives and nutritional fortifiers, through heating, stirring, emulsification (drying) and other processes.

## **3.2 Sensory requirements**

Sensory requirements shall meet the requirements of Table 1.

### **3.3.1 The contaminant limit shall comply with the provisions for processed cheese in**

GB 2762.

### **3.5.1 The use of food additives shall comply with the provisions of processed cheese in**

GB 2760.

## **4.2 Products shall be marked with "processed cheese" or "cheese products". Processed**

cheese may also be called "processed dry cheese".
