Foreword

All technical contents of this standard is mandatory.

This standard was drafted in accordance with rules GB/T 1.1-2009 given.

This standard is proposed and managed by the National Information Technology Standardization Technical Committee (SAC/TC28).

This standard was drafted. Weifang Beida Jade Bird Huaguang typesetting Ltd., China Electronics Standardization Institute, China Tibetology in Heart, Tibet Tibetan Language Work Committee Office.

Drafters of this standard. Lvjian Chun, Cong Bo, on behalf of the red, Yan Jianmin, Zhou Hua, Chen Zhuang, Xu Zhiqiang, Gong Bao Dagestan, Xiong Tao, Feng Haixia, the character of jade.

Introduction

According to this standard GB 16959-1997 "Technical information exchange with Tibetan coded character set basic set" and GB/T 20542-Under the 2006 "Information technology - Tibetan coded character set - Extension A" and some Tibetan Sanskrit transliteration Tibetan character, Tibetan land to our country Standard font area was designed based on the predetermined information systems and Tibetan 24 x 48 dot matrix Idan autologous (see Appendix A) font.

Authorize the relevant font data transfer using matters font standard data maintenance,

updating and revision of the unified responsibility of focal point.

Address. Dongcheng District Andingmen East Avenue (Beijing 1101 mailbox) Postal Code. 100007 Tel. 6,400,768,984,029,173 Fax. 64007681 E-mail. daihong@cesi.ac.cn Information technology - Tibetan coded character set (Basic sets and expansion sets A) 24 x 48 dot font Idan white body

1 Scope

This standard specifies a 24 x 48 dot matrix Idan autologous GB 16959-1997 and GB/T 20542-2006 of graphic characters in Tibetan Font.

This standard is primarily applicable to the display device Tibetan information processing system, an output dot matrix device can also be used for other related equipment.

2 Normative references

The following documents for the application of this document is essential. For dated references, only applies to the version dated paper Pieces. For undated references, the latest edition (including any amendments) applies to this document.

GB 16959-1997 Technical information exchange with a basic set of coded character set Tibetan GB/T 20542-2006 Information technology - Tibetan coded character set - Extension A

3 Terms and Definitions

The following terms and definitions apply to this document.

Font glyph

A recognizable abstract graphic symbols, it does not depend on any particular design.

Font font

Glyph image set having the same basic design, such as. Ganden white body.

Bitmap font dotmatrixfont to rendezvous to phenotype graphic character (shape).

Word order characterorder in the graphic character set is arranged in order according to certain rules.

4 Standard data management

To strengthen the management of electronic information technology products Tibetan font standard data, to ensure the correctness of the implementation of this standard in data and Consistency to authorize the use of font data transfer issues, to maintain the standard font data, updating and revision, unified by a centralized unit be responsible for.

5.1 Grid

Raster is formed by the vertical and horizontal lines intersecting equidistant from several pieces.

Specified in this standard is 24 x 48 dot matrix font, which is transverse grid 24 grid, 48 longitudinal grid. The center of each grid point in a given Heart position.

Only the grid points constituting each lattice positioning grid shown in Figure 1.

FIG matrix 1 24 x 48 grid of FIG.

5.2 Points

Point is the minimum unit of dot font, which is located within each square black areas.

5.3 Dot matrix typeface

Tibetan word bitmap fonts from several points located within the set of grid FIG. Tibetan ""
The 24 x 48 dot matrix font as 2 shown in FIG.

FIG 2 24 x 48 dot matrix Tibetan "" font

6 Tibetan bitmap fonts

6.1

The number of characters this standard provides a 24 x 48 dot GB 16959-1997 and GB/T 20542-2006 predetermined character pattern 1729 Tibetan Array Idan shaped white body, including in GB 16959-1997 193 th and GB/T 20542-2006 in 1536.

6.2 Word order

24 x 48 dot-shaped body of the present Idan white standard 1729 provides graphic characters in accordance with Tibetan and GB 16959-1997 Character word sequences aligned GB/T 20542-2006 predetermined.

6.3 Tibetan font data

Tibetan 24 x 48 dot font data representation, Appendix B.

Tibetan bitmap font table 6.4 this standard provides a graphic character Tibetan 1729 24 x 48 dot font Idan autologous Table 1 and Table 2.

Appendix A

(Informative)

Tibetan Ganden white body Tibetan Ganden specified in this standard () white body with reference to Dege woodcut, wood pond that version of "Kanjur" "Tengyur" and other versions Font creation, is one of many different styles of white body in a unique typeface font.

Appendix B

(Normative)

Tibetan 24 x 48 dot matrix font data B.1 Tibetan of 24 x 48 dot matrix font data representing this standard, Tibetan font data may be represented by a dot. Each dot font data is 24 x 48 (dots x transverse column Points), a total of 1152 bits, 144 bytes.

B.2 Tibetan recording format 24 x 48 dot font data Tibetan 24 x 48 dot matrix font data of 144 bytes are arranged in the order of byte 0 to byte 143 ends, are made of hexadecimal System indicates, 3 bytes per line, which is a recording format shown in Table B.1.

Table B.1 24 x 48 dot font data recording format
