Foreword

All technical contents of this standard are mandatory. This standard was drafted in accordance with the rules given in GB/T 1.1-2009. This standard is proposed and managed by the Ministry of Civil Affairs of the People's Republic of China. Basic norms of service security for the elderly

1 Scope

GB 38600-2019 is the Chinese national standard on basic specification of service safety for senior care organization, in the field of services and company organization. It carries no /T suffix, which in the Chinese system means compliance is mandatory: a product or a practice within its scope has to meet it to be lawfully made, sold or carried out in China. It was issued on 27 December 2019 by the State Administration for Market Regulation; Standardization Administration of China, and has been in force since 1 January 2022. Classification: ICS 03.080.99, CCS A20. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard stipulates the basic requirements for service security, security risk assessment, service protection, and management requirements for elderly care institutions. This standard applies to the service security management of old-age institutions.
