What this standard covers

This standard specifies the emission control requirements, monitoring and supervision management requirements for lime and calcium carbide industrial air pollutants. This standard is applicable to the air pollutant discharge management of existing lime and calcium carbide industrial enterprises or production facilities, as well as the environmental impact assessment, environmental protection facility design, completed environmental protection inspection and acceptance of lime and calcium carbide industrial construction projects, the issuance of pollutant discharge permits and their commissioning. Post air pollutant emission management. The emission of air pollutants in the lime production process in the iron and steel industry, aluminum industry and other industries shall comply with the relevant provisions of this standard. This standard does not apply to lime production facilities that use lime dense tail gas as raw material gas to produce chemical products.
