What this standard covers

This Chinese standard applies to integrated circuits, discrete semiconductor device manufacturing equipment installation engineering construction and acceptance. This standard does not include the production of integrated circuits and discrete semiconductor devices commissioning and trial production equipment linkage. Microelectronics production equipment installation construction documents used in engineering, contract documents and construction quality acceptance for not less than the requirements of this standard. Microelectronics manufacturing equipment shall be installed in place construction of the approved design drawings, modify the design of the original design unit should change notification. Instrumentation for detection shall be approved by the national legal metrology institutes certified and should be used in the test period. Microelectronics production equipment installation engineering construction and acceptance in addition to the implementation of this standard, there should be consistent with existing national standards.

Document data

International classification (ICS): 31.

Chinese classification (CCS): P82.

Estimated length of the Chinese original: 72,772 words.
