What this standard covers

This Chinese standard applies to storage medium weight not more than 10kN/m³ crude oil, petrochemical products and other similar liquids at atmospheric pressure (including micro-pressure) vertical cylindrical steel tank foundation (hereinafter referred to as "tank foundation.") design. This standard does not apply to storage temperature, the medium for the extreme toxicity or highly hazardous media, acid or alkali corrosive medium and elevated tank foundation design. Tank foundation design in addition to the implementation of this standard, there should be consistent with existing national standards.
