What this standard covers

This standard applies to the center of the height of less than or equal to 350m symmetrical or less than 250mm height of non-center symmetrical steel and concrete construction of high-rise construction quality acceptance. For the center of the height of more than 350m symmetrical or more than 250m height of the non-center symmetrical structure, the construction quality acceptance criteria should be done before the construction of a special demonstration.

Document data

Chinese classification (CCS): P20.

Estimated length of the Chinese original: 124,187 words.
