Foreword

In addition to all the technical word in Tables 1 to 11 area area the contents of GB 6345 This section is mandatory.

GB 6345 "Information technology - Chinese ideogram coded character set (basic set) - 32 dot matrix font" is divided into four parts.

--- Part 1. Times New Roman;

--- Part 2. blackbody;

--- Part 3. italics;

--- Part 4. italics.

This is Part 2 GB 6345's.

The provisions of section 32 dot matrix Chinese font is "the first Chinese word order," and "Simplified summary table", "Chinese Characters General Printing

Table "and" Modern Chinese generic word table "(see reference) as the basis, designed in accordance with current Chinese Characters consolidation principles.

This Part replaces GB/T 12036-1989.

This section compared with the GB/T 12036-1989, the main changes are as follows.

a) In order to further improve the quality of fonts and ensure harmonization between the standards of the first edition of part of the mathematical symbols Region 1 error Was amended;

b) for Zone 3, Area 10-character errors, lowercase letters from the reference line errors corrected;

- c) area of 4, 5 District Japanese kana/katakana character part has been redesigned;
- d) of the last version is not the right character fonts have been corrected.

This section of the Appendix A, Appendix B is a normative appendix.

This section proposed by the People's Republic of China Ministry of Information Industry.

This part of the jurisdiction of the China Electronics Standardization Institute.

Introduction

Authorization to use the relevant font data transfer matters, to maintain the standard font data, updating and revision of unity is responsible for the centralized units.

Address. Andingmen East Street, Dongcheng District No. 1 (Beijing 1101 mailbox) Zip Code. 100007 Tel. 6,400,768,984,029,173 Fax. 64007681 E-mail. daihong @ cesi. ac. cn
Information technology - Chinese ideogram coded character set (basic set) 32 dot matrix font - Part 2. blackbody

1 Scope

GB 6345 of the provisions of this part of GB 2312-1980 "basic set of information exchange with Chinese character coded character set" in the 32 graphic characters Lattice boldface type.

This section applies to a variety of electronic information products, all kinds of digital products, can also be used for other related equipment.

2 Normative references

The following documents contain provisions which, through reference in this Part of GB 6345 constitute provisions of this section. For dated references, all subsequent amendments (not including errata content) or revisions do not apply to this section, however, encourage the agreement on this section Whether the parties can study the latest versions of these documents. For undated reference documents, the latest versions apply to this section.

GB 2312-1980 exchange of information with Chinese characters coded character set basic set

3 Terms and Definitions

The following terms and definitions apply to this part of GB 6345.

One kind of recognizable abstract graphic symbol, it does not depend on any particular design.

Glyph image set having the same basic design, such as. bold.

In a collection of dots to show the graphic character type (shape).

Graphic character in the set are arranged according to certain rules of order.

4 Character graphics character

According to the provisions of GB 2312-1980, it provided appropriate.

Zone 1 to 9 area of foreign letters and other graphic characters 682;

District 16 to 55 region of the first stage characters 3755;

District 56 to 87 region of the second stage 3008 characters.

Also in the District 8 27 ~ 32 supplemented with 6 characters; 10 area 01 ~ 94 supplemented with 94-byte graphic characters; 11 area 01 ~ 32 supplemented with 32 half-width characters pinyin, see Appendix A.

This section provides a total graphic character 7577.

5 Standard data management

To strengthen the management of electronic information technology products use standard Chinese character font data, to ensure the correctness of the data in the implementation of this section and Consistency to authorize the use of font data transfer matters, to maintain the standard font data, updating and revision, unified by the NFP be responsible for.

The method represents bitmap fonts

6.1 Grid

Equidistant grid by a number of vertical and horizontal lines intersect to form.

The provisions of section 32 bitmap fonts, which is a lateral grid 32 grid, 32 longitudinal grid. The center of each square as the center point position.

Raster Only constituting the lattice points are positioned 32 dot grid shown in Figure 1.

Figure 132 dot raster

6.2 Points

Point is the smallest unit constituting the lattice-shaped, circular indicated that it is located within the black areas of the parties to the grid.

6.3 Lattice words

Word character dot-matrix font by the number of points placed within the grid set to represent. Chinese character "Yong" word lattice 32 in FIG. 2 FIG.

Figure 2 32 dot matrix Chinese word "never" in

6.4 Font data

32 dot font data representation, see Appendix B.

Table 6.5 bitmap fonts

This section provides 7445 characters/graphic characters and supplementary provisions of GB 2312-1980 132 32 dot matrix graphic character Boldface type.

This part of the bitmap fonts are listed below.

3GB 6345.2-2008

4GB 6345.2-2008

5GB 6345.2-2008

6GB 6345.2-2008
