consultation center, treatment room, observation room, specimen reception;

1 Scope

GB/T 10001.6-2021 is the Chinese national standard on public information graphical symbols - part 6: symbols for medical treatment and health care, in the field of generalities, terminology and documentation. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 9 March 2021 by the State Administration for Market Regulation; Standardization Administration of China, and has been in force since 1 October 2021. Classification: ICS 01.080.10, CCS A22. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This part of GB/T 10001 defines the graphic symbols for public information in health care (hereinafter referred to as graphic symbols), and gives a diagram The meaning and description of the graphic symbols, and the requirements for the application of graphic symbols are stipulated. This part is applicable to hospitals, emergency centers, health centers, physical examination centers and other medical and health care places and related facilities, and is specifically used for public information guidance. Direction signs, guidance signs, information index signs, plan diagrams, block guidance maps, portable prints and other information carriers in the system The design of guiding elements in the

4 Graphic symbols

The medical care symbols and their meanings and descriptions are shown in Table 1.

5 Principles of Application

5.1 This part should be used in conjunction with GB/T 10001.1 and GB/T 10001.9. In application, if other graphic symbols are needed, they should be Selected from the rest of GB/T 10001.

5.2 If you need to design a new graphic symbol, it should be designed in accordance with the requirements of GB/T 16903, and should be designed in accordance with GB/T 16900.2 and GB/T 16903.31) requirements for testing. 1) This standard is proposed to be revised and renumbered as GB/T 16900.3.

5.3 The subscripts in the graphic symbol column of Table 1 do not constitute an integral part of the graphic symbols, but are only the basis for defining the symbol area. In design-oriented In the case of prime, the graphic symbols (including the subscripts) in Table 1 should be enlarged or reduced in equal proportions, and the position of the graphic symbols should be determined based on the subscripts.
