

ICS 25.180.10
CCS K 61

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 10067.5-1993

**Basic specifications for electroheat installations. High
frequency dielectric heating installations
(English Translation)**

Issued on: December 28, 1993

Implemented on: October 1, 1994

Issued by: State Bureau of Technical Supervision

What this standard covers

This standard specifies the requirements for the high-frequency dielectric heating equipment, including product classification, technical requirements, test methods, inspection rules, technical grading, marking, packaging, transportation, storage, ordering and delivery and so on. This standard applies to frequency 1 ~ 300MHz, 50W output power greater than or equal to the high-frequency dielectric heating equipment (hereinafter referred to as the device). The device is available in a natural atmosphere, protecting the atmosphere and the vacuum on, such as plastic, wood, rubber, textiles, glass, ceramics, paper, food and some other conductive or non-conductive material is heated, softened, heat sealing and drying thermal processing processes. Product standard equipment should be developed in accordance with this standard.

Document data

International classification (ICS): 25.180.10.

Chinese classification (CCS): K61.

Estimated length of the Chinese original: 11,120 words.
