

ICS 37.040.20
CCS G 80

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 10557-1989

**Method for determination of spectral sensitivity of
photographic materials**

感光材料光谱灵敏度测定方法
(English Translation)

Issued on: March 22, 1989

Implemented on: December 1, 1989

Issued by: State Bureau of Technical Supervision

What this standard covers

This standard specifies the principle of measuring the spectral sensitivity of photographic materials, equipment, methods of operation, calibration methods and results of the spectral representation of aliasing and other content areas. This standard applies to the spectral sensitivity range of 360 ~ 900nm in all kinds of light-sensitive material. Including black and white and color materials, negative, positive, and reversal materials, the support for the transparent and opaque materials.

Document data

International classification (ICS): 37.040.20.

Chinese classification (CCS): G80.

Estimated length of the Chinese original: 5,565 words.

Adopted international standard: ???????? 2818-1983, NEQ.
