CCS B91

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 10940-2008

Replacing GB/T 15372-1994

Reciprocation type grass cutter

往复式割草机

Issued on: June 3, 2008

Implemented on: January 1, 2009

**Issued by: General Administration of Quality Supervision, Inspection and
Quarantine of the People's Republic of China;
Standardization Administration of China**

Foreword

This standard is GB/T 10940-2005 "Reciprocating mower types and basic parameters", GB/T 15372-1994 "reciprocating cutting Rake term "and GB/T 15373-1994" merge revisions, major changes reciprocating mower technology "as follows:

- The standard name changed to "reciprocating mower";
- Individual term in English has been modified;
- Added "headless grass section" Terminology;
- Increase the technical requirements of the performance requirements;
- Delete the original standard mower blade protection device beams, the cutter head, smooth palm material provisions;
- Remove the outlet mower do load operation test pressure and increase the pressure on the blade edge device as an analog test test;
- Increasing the idling test items;
- Modify the sampling plan to determine the rules and content;
- Increased mower "lubrication points, transmission system, adjust the site" label. From the date of implementation of this standard instead of GB/T 10940-2005, GB/T 15372-1994 and GB/T 15373-1994. The standard proposed by China Machinery Industry Federation. This standard by the National Standardization Technical Committee of agricultural machinery. This standard was drafted. Chinese Academy of Agricultural Mechanization Sciences Hohhot branch. The main drafters of this standard. LI Xiu-rong, high Chenming. This standard replaces the standards previously issued as follows:
- GB/T 10940-2005;
- GB/T 15372-1994;
- GB/T 15373-1994. Reciprocating mower

1 Scope

GB/T 10940-2008 is the Chinese national standard on reciprocation type grass cutter, in the field of agriculture. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 3 June 2008 by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 1 January 2009. Classification: ICS 65.060.50, CCS B91. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the terms reciprocating mower, type, model and basic parameters, technical requirements, test methods and inspection rules, signs, Packaging, transport and storage. This standard applies to reciprocating tractor mower.

2 Normative references

The following documents contain provisions which, through reference in this standard and become the standard terms. For dated references, subsequent Amendments (not including errata content) or revisions do not apply to this standard, however, encourage the parties to the agreement are based on research Whether the latest versions of these documents. For undated reference documents, the latest versions apply to this standard.

GB/T 1209-2002 agricultural machinery Cutter

GB/T 10938-2008 rotary mower GB/T 13306 signs

JB/T 8836 Reciprocating mowers - Safety requirements

3 Terms

GB/T 10938-2008 determined and the following terms and definitions apply to this standard.

3.1 The term machine

3.1.1 Mower cutter for reciprocating movement.

3.1.2 Animal powered reciprocating mower.

3.1.3 With tractor mowing reciprocating mower.

3.1.4 Reciprocating hanging on tractor mower, partly supported by the weight of walking round.

3.1.5 Hanging on reciprocating mower tractor, the weight borne by the tractor.
