### What this standard covers

This standard specifies the determination of remanence, coercivity, the maximum magnetic energy product, such as in a closed magnetic circuit to measure permanent magnet rubber. This standard applies to the determination of isotropic permanent magnet rubber magnetic properties; also applies to the determination of isotropic permanent magnet magnetic properties of rubber and plastic materials.

### Document data

International classification (ICS): 83.080.01.

Chinese classification (CCS): G40.

Estimated length of the Chinese original: 6,696 words.
