What this standard covers

This standard specifies the return loss in the frequency range of the input and output power measurements equal eight electrical characteristics. The standard measurement method given appropriate and in frequency division multiplexing (FDM)/frequency division multiple access/FM systems, measurement methods other multiple access technology and other modulation system is being considered.

Document data

International classification (ICS): 33.060.30.

Chinese classification (CCS): M35.

Estimated length of the Chinese original: 13,156 words.

Adopted international standard: IEC 60510-1-3-1980, IDT.
