Foreword

This standard GB/T 1.1-2009 given rule drafting. This standard replaces GB/T 11490-1989 "color tubes of group size." This standard compared with GB/T 11490-1989 main changes are as follows:

--- Increased in Chapter 2, normative references;

--- Increased Chapter

3 Terms and definitions;

--- With three types of pipe base Dimensions and concrete dimension example instead of the original standard size concrete pipe base maps and marked Names were specified size;

--- Increasing the tube base electrode wiring diagram of an example;

--- Deleted Chapter

3 Inspection gauges. The standard proposed by the Ministry of Industry and Information Technology of the People's Republic of China. This standard by the National Standardization Technical Committee electric vacuum devices (SAC/TC167) centralized. This standard was drafted. Rainbow Group. The main drafters of this standard. Huang Ning songs, cow small plum, Han Seung. This standard replaces the standards previously issued as follows:

--- GB/T 11490-1989. Color tubes of group size

1 Scope

GB/T 11490-2011 is the Chinese national standard on dimensions of base for color picture tubes, in the field of electronics. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 30 December 2011 by the General Administration of Quality Supervision, Inspection and

Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 1 July 2012. Classification: ICS 31.100, CCS L38. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the color picture tube of the tube-based outline drawings, dimensions and electrode wiring requirements. This standard applies to the plug socket of the color picture tube.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version suitable for use herein Member. For undated references, the latest edition (including any amendments) applies to this document.
