What this standard covers

This standard specifies the surfactant, evaluation methods to test the characteristics of high viscosity emulsion and emulsifying ability. This standard applies to one or several of the emulsion surfactants and one or more water-insoluble liquid or solid water formation. The emulsion temperature within the range of performance tests should maintain its rheology.

Document data

International classification (ICS): 71.100.40.

Chinese classification (CCS): G72.

Estimated length of the Chinese original: 8,845 words.

Adopted international standard: NF T73-418-1983, NEQ.

Supersedes the earlier edition GB/T 11543-1989.
