What this standard covers

This standard specifies the optical parts of the surface flaws of terms, definitions, symbols, tolerances, marking and test methods. This standard applies to optical parts polished, milling, molding, coating and other processed surface rough degree $R2 \leq 0.1\mu\text{m}$ transmission and reflection surface characterization by optical parts, gluing, coating, etc. After processing the transmission and reflection surface can also be implemented by reference.

Document data

International classification (ICS): 01.100.01; 17.180.37.

Chinese classification (CCS): N30.

Estimated length of the Chinese original: 28,244 words.

Adopted international standard: ISO 10110-7-1996, NEQ; ISO 14997-2003, NEQ.

Supersedes the earlier edition GB/T 1185-1989.
