What this standard covers

This standard specifies the spectroscopic dimethylglyoxime (dimethyl glyoxaloxime) spectrophotometric determination of industrial wastewater and water Nickel by environmental pollution. When taking the sample volume 10mL, this law can be measured a maximum of 10mg/L, the minimum detectable concentration of 0. 25mg/L. Appropriate to take samples or dilution can be measured concentration range can extend.

Document data

International classification (ICS): 13.060.40.

Chinese classification (CCS): Z16.

Estimated length of the Chinese original: 5,530 words.
