

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 12005.1-1989

Determination for limiting viscosity number of polyacrylamide

聚丙烯酰胺特性粘数测定方法

(English Translation)

Issued on: December 25, 1989

Implemented on: November 1, 1990

Issued by: SAMR; SAC

What this standard covers

This standard specifies the determination of the intrinsic viscosity of polyacrylamide dilution method and point method. The standard dilution method for accurate determination of intrinsic viscosity; little law applicable to the general intrinsic viscosity measurement. This standard applies to the determination of different polymerization process powdery or polyacrylamide gel nonionic and anionic polyacrylamide intrinsic viscosity. This standard does not apply to the determination of the intrinsic viscosity additive containing polyacrylamide is used for this type of sample, after removal of the additives can be determined using this standard.

Document data

Chinese classification (CCS): G31.

Estimated length of the Chinese original: 7,764 words.
