### What this standard covers

This standard specifies the method for determining the DC power transistors, pulse, and safe operating area test methods and safe working area. This standard is complementary to national standard GB 4587 "bipolar transistor test method". This standard applies to test the power transistor safe operating area.

### Document data

International classification (ICS): 31.080.30.

Chinese classification (CCS): L40.

Estimated length of the Chinese original: 5,577 words.
