### What this standard covers

This standard specifies the test metal ring-test block wear test terminology and definitions, test principle, test equipment and instruments, , test methods, test results and test report specimen handling. This standard applies to the determination of the amount of wear and friction coefficient of sliding friction of metal materials under conditions.

### Document data

International classification (ICS): 77.040.10.

Chinese classification (CCS): H22.

Estimated length of the Chinese original: 11,173 words.

Adopted international standard: ASTM G77-1998, NEQ.

Supersedes the earlier edition GB/T 12444.2-1990.
