What this standard covers

This standard specifies the method of calculating the vapor pressure, relative density and motor octane number of liquefied petroleum gas composition. This standard applies to liquefied petroleum gas. This standard does not apply to the determination by SY 7509 residues greater than 0.05mL/100mL products. Only for motor octane propylene content of not more than 20% of the sample mixture.

Document data

International classification (ICS): 75.160.30.

Chinese classification (CCS): E46.

Estimated length of the Chinese original: 1,157 words.

Adopted international standard: ASTM D2598-1991, MOD; ASTM D2421-1995, NEQ.

Supersedes the earlier edition GB/T 12576-1990.
