What this standard covers

This standard specifies the vulcanized rubber and plastics for tear strength test, or rubber and rubber, covered with rubber (or plastic) like fabric and glue (or plastic) as well as covered with plastic (or plastic) fabric with after the fabric adhesive strength test method for calculation of five kinds of the adhesive strength and the tear strength is. Obtained in the test of the force-time curve to calculate the peak value and the value of the pole pitch, is the test result.

Document data

International classification (ICS): 83.060; 83.080.01.

Chinese classification (CCS): G40.

Estimated length of the Chinese original: 6,641 words.

Adopted international standard: ISO 6133-1998, IDT.

Supersedes the earlier edition GB/T 12833-1991.
