What this standard covers

This standard applies to high selectivity and stability of piezoelectric ceramic filters. The filter is intended for electronic equipment. This standard is intended to implement the provisions of such filter Phi priority ratings and characteristics, and from the general specification (GB/T 17190), select the appropriate quality assessment procedures, test and measurement methods and general performance requirements are given. Severities and requirements prescribed in the detail specification shall have the same or a higher sub-specification performance levels.

Document data

International classification (ICS): 31.16.

Chinese classification (CCS): L18.

Estimated length of the Chinese original: 15,156 words.

Adopted international standard: IEC 61261-2-1994, IDT.

Supersedes the earlier edition GB/T 12864-1991; GB/T12866-1991.
