What this standard covers

This standard specifies the pultruded rod mechanical properties of glass fiber reinforced plastic test tensile properties, bending properties, in-plane shear strength, apparent horizontal shear strength test method. This standard applies to the determination of diameter (3 to 25) mm pultruded glass fiber reinforced plastic rod tensile properties, diameter greater than 13 mm pultruded glass fiber reinforced plastic rod bending performance, diameter (16 ~ 32) mm pultruded glass fiber reinforced plastic rod -plane shear strength and pultruded fiberglass reinforced plastic rods apparent horizontal shear strength.

Document data

International classification (ICS): 83.120.

Chinese classification (CCS): Q23.

Estimated length of the Chinese original: 17,197 words.

Adopted international standard: ASTM D3916-2002, MOD; ASTM D4476-2003, MOD; ASTM D3914-2002, MOD; ASTM D4475-2002, MOD.

Supersedes the earlier edition GB/T 13096.1-1991; GB/T 13096.2-1991; GB/T 13096.3-1991; GB/T 13096.4-1991.
