What this standard covers

This standard specifies the use of optical vertical line as a reference line, outside the tank or the tank calibration measurement methods and calculation steps vertical cylindrical metal tank volume. This standard applies to 8m in diameter than new construction, alteration or use of simple vertical circle-shaped metal tanks, new thermal insulation should be installed in the tank after calibration. This standard does not apply to any height on the level of the circumference or diameter greater than 1% change in the inclination of more than 3% of the vertical cylindrical tanks.

Document data

International classification (ICS): 23.020.10.

Chinese classification (CCS): E08.

Estimated length of the Chinese original: 24,295 words.

Adopted international standard: ASTM D4738-1990, NEQ.
